Experience

Meituan

Jun. 2026 – Sep. 2026

Backend Software Engineer Intern, Core Local Commerce Engineering Platform

Shanghai, China

- Implemented **6 REST APIs in Java/Spring Boot** for merchant promotion setup, rule validation, and eligibility checks, serving **10K+ requests per week** across merchant-facing workflows and integrating with **4 internal services**.
- Profiled a read-heavy eligibility endpoint, eliminated redundant MySQL queries through **composite indexing and query restructuring**, and added a **Redis cache-aside layer**, cutting **P95 latency by 31% (210→145 ms)**.
- Added **80+ JUnit 5 and MockMvc tests across 30+ REST endpoints**, increasing core-module coverage from **69% to 85%** while covering invalid requests, cache misses, database failures, and downstream-service timeouts.
- Contributed to **2 technical design documents** covering API contracts, schema changes, caching behavior, and rollback plans, and shipped **20+ reviewed code changes**; used **Cursor** for codebase navigation and test scaffolding, validating generated changes through automated tests and CI checks.

Industrial Securities Co., Ltd.

Mar. 2025 – Sep. 2025

Software Engineer Intern, Developer Tools & Platform Engineering

Beijing, China

- Built internal **Java developer tooling for AST-based static analysis** with JavaParser, running across a **200K+ LOC codebase spanning 50+ services** to automate repeatable validation and reduce manual code inspection.
- Redesigned **PostgreSQL dependency-graph traversal algorithms** used for downstream service-impact analysis, achieving **2× faster analysis** and **40% lower peak memory**.
- Built real-time monitoring components supporting **3K+ concurrent test and experiment runs using Kafka and Flink**, processing operational signals with **sub-second latency**.
- Developed **failure diagnostics, dependency-impact analysis, and validation workflows** to surface risky service changes and troubleshoot regressions before production deployment.

Guotai Haitong Securities

Jan. 2024 – May 2024

Full-Stack Software Engineer Intern, Market Data Platform

Beijing, China

- Developed **Java/Spring Boot backend services** for a real-time equity market-data platform, ingesting **Level 2 streaming data through Kafka** and supporting downstream monitoring and operational workflows.
- Developed and documented **40+ REST API endpoints with Swagger/OpenAPI**, supporting service integration and data exchange across backend and frontend applications.
- Developed **React/Redux interfaces** for real-time **market monitoring and operational workflows**.
- Built **JUnit 5 regression tests and Apache JMeter performance tests** for core services, and automated testing, container builds, and **Kubernetes deployments through a self-hosted GitLab CI/CD pipeline**.

Projects

CodeGraph Copilot — Developer Infrastructure & Service Dependency Intelligence

- Built a **Java/Python developer platform** combining AST-based static analysis, graph traversal, and PostgreSQL dependency modeling to detect risky service changes, missing instrumentation, unused APIs, and validation-rule violations.
- Designed **PostgreSQL schemas** for files, symbols, call edges, dependency paths, build records, validation rules, and issue fingerprints, enabling structured service-impact and failure analysis.
- Integrated **AI-assisted diagnostics** over deterministic analysis to generate root-cause summaries, dependency-impact explanations, test suggestions, and **CI/CD debugging guidance**.

Skills

Languages: Java, Python, JavaScript, TypeScript, Go, C/C++, SQL, Bash/Shell

Frameworks: React.js, Next.js, Node.js, Express.js, FastAPI, Django, Spring Cloud, Vue.js

AI / ML: PyTorch, Hugging Face, LLMs, Transformers, LoRA/QLoRA, Model Evaluation, Deep Learning

Cloud & Infrastructure: AWS (EKS, EC2, S3), Google Cloud, Docker, Kubernetes, Linux/Unix, GitLab CI/CD, Git

Data & Developer Tools: PostgreSQL, MongoDB, Redis, Elasticsearch, Kafka, Flink, JavaParser, JUnit 5

Education

University of Washington

Sept. 2025 – June 2027

M.S. in Information Management (Specialization in Data Science & AI) (GPA: 3.9/4.0)

Seattle, WA

Peking University

Sept. 2023 – June 2025

Minor in Economics (GPA: 3.8/4.0)

Beijing, China

Beijing International Studies University

Sept. 2021 – June 2025

B.A. in Turkish (GPA: 3.9/4.0)

Beijing, China
